

C L A I M S

What is claimed is:

1. An easily removable child's hand rail for a bath tub
5 having a bottom surface and a back wall, said removable rail
comprising an elongated hand rail, and two horizontal anchors
connected substantially perpendicularly to the elongated rail,
and extending parallel to one another, each horizontal anchor
terminating in an end piece with a suction cup facing away
10 from the elongated rail, for attachment to the wall of the
tub; and two vertical anchors connected substantially
perpendicularly to the elongated rail, and extending parallel
to one another, each vertical anchor terminating in an end
piece with a suction cup facing away from the rail, for
15 attachment to the bottom surface of the tub.

2. The easily removable bathtub rail of Claim 1, wherein
the horizontal anchors are connected to the rail by elbow
connectors.

20 3. The easily removable bathtub rail of Claim 1, wherein
the horizontal anchors are of equal length.

4. The easily removable bathtub rail of Claim 1, wherein the rail comprises at least two pieces which may be securely fitted to one another for installation of the elongated bathtub rail, but easily separated for storage.

5

5. The easily removable bathtub rail of Claim 4, wherein the horizontal anchors are connected to the elongated rail by elbow connectors.

10

6. The easily removable bathtub rail of Claim 4, wherein the vertical anchors are joining to the elongated rail by T-connectors.

15

7. The removable bathtub rail of Claim 1, wherein the vertical anchors are of equal length.

20

8. The easily removable bathtub rail of Claim 1, wherein the suction cups are connected to the horizontal anchors by pivotable connections.

9. The easily removable bathtub rail of Claim 2, wherein the suction cups are connected to the horizontal anchors by pivotable connections.

10. The easily removable bathtub rail of Claim 5, wherein the suction cups are connected to the horizontal anchors by pivotable connections.

5 11. The easily removable bathtub rail of claim 1, wherein the suction cups of the vertical anchors are connected to the anchors by pivotable connections.

10 12. The easily removable bathtub rail of claim 6, wherein the suction cups of the vertical anchors are connected to the anchors by pivotable connections.

15 13. The easily removable bathtub rail of claim 1 wherein the elongated rail and anchors comprise hollow plastic piping.

14. The easily removable bathtub rail of claim 3, wherein each horizontal anchor comprises at least two pieces that may be securely fitted to one another but easily separated.

20 15. The easily removable bathtub rail of claim 5, wherein each vertical anchor comprises at least one piece, which may be securely fitted to the T-connectors.

16. The easily removable bathtub rail of claim 6, wherein the T-connectors are connected between the elongated handrail and the elbows of the horizontal anchors.

5 17. The easily removable bathtub rail of claim 16, further comprising a rail spacer between the T-connector and the elbow connector.

10 18. The easily removable bathtub rail of claim 2, further comprising a horizontal spacer connected between the elbow connectors and the pivotable suction cup end pieces.

15 19. The easily removable bathtub rail of claim 17, further comprising a horizontal spacer connected between the elbow connectors and the pivotable suction cup end pieces.

20 20. The easily removable bathtub rail of claim 1, wherein the handrails is constructed transparent material, and sealed at its ends, to contain liquid in decorative objects disposed therein.
